

I believe as an individual I could make myself better and happier and make my life fabulous.

I believe that now that I am an adult, that I take care of my responsibilities and accomplish my duties.

When I played basketball in 6th grade I was really good, and this happened at South Middle School and the school was pretty cool. When I was on the court, I felt happy and felt like I wanted to score all the points.

I believed I could do anything in life, and that's true because my dad told me I could do anything if I just set my mind on it, and I truly believed him.

I will not stop trying to make something out of myself because I want a career ahead of me.

I'm planning on being a barber, or planning to be a landscaper because I like cutting hair and I like working on people's yards.

I like working hard because it gets you money and it helps you to pay your bills and it gets you whatever you want. So that's what I'm planning to do for my career in life. And take care of my family.

For writing or discussion:

1. Do you think that you can “make yourself better and happier” and make your own life fabulous?
2. Do you think this person (above) has goals? How would you identify those? Do you think he will achieve his goals? Why or why not?
3. What is the most important point of this essay?
