

Name \_\_\_\_\_

Some students are having a lot of trouble with their classes at our school. How could improving their social skills help them improve as students?

1. **Being a good listener**

Ted: "I never know what my assignments are, or when they are due."

2. **Working with others**

Susan: "I know we were supposed to work on this project together but I am just too busy, so I didn't turn in my part of it."

3. **Reacting appropriately to peer pressure**

Jim: "I would much rather go out with my friends than stay at home on a weekend to study! Let's go!"

4. **Being able to analyze, or carefully examine, the situation**

Linda: "I don't care if I get an F on the quiz. All I have to do is get a high enough grade on the final test to pass this class."
